EDUCATION

Vellore Institute of Technology-Bhopal
Bachelor of Technology in Computer Science & Engineering
CGPA: 8.52

Bhopal, India

August 2023 – July 2027

EXPERIENCE

GenAI Creative Engineer Intern
That's Obvious AI

May 2026 – June 2026
New Delhi

- Built and deployed 3 production-ready Generative AI workflows using ComfyUI, including text-to-video, LipSync, and background replacement solutions.
- Integrated and fine-tuned open-source AI models and custom ComfyUI nodes to create efficient and scalable multimedia generation pipelines.
- Worked closely with the team to develop and deploy AI-powered creative automation workflows that are actively used in production.

PROJECTS

Multimodal ASD Screening & Scoring Platform | *Python, PyTorch, OpenCV, Scikit-Learn*

- Built an AI-powered screening platform for early Autism Spectrum Disorder (ASD) risk assessment by integrating facial behavior, speech characteristics, and clinical questionnaire data into a unified prediction pipeline.
- Engineered end-to-end preprocessing, feature extraction, and model training workflows using PyTorch and Scikit-Learn, achieving 92% classification accuracy on the evaluation dataset.
- Designed a multimodal risk-scoring framework that generated interpretable probability scores, reducing manual assessment effort by 40% during preliminary screening.

Industrial Equipment Monitoring & Predictive Analytics Dashboard | *Python, Streamlit, PyQt, Matplotlib*

- Designed a real-time industrial monitoring dashboard using Python, Streamlit, and Matplotlib to visualize pressure, temperature, and flow-rate telemetry from manufacturing equipment.
- Implemented threshold-based anomaly detection with automated alerts, identifying abnormal operating conditions with 90%+ detection accuracy and reducing manual monitoring effort by 60%.
- Optimized data processing pipelines to refresh sensor data in under 2 seconds, enabling near real-time monitoring for industrial environments.

Real-Time Object Detection using YOLOv8 | *Python, YOLO, OpenCV, TensorFlow, NumPy*

- Developed a real-time multi-object detection system using YOLOv8 and OpenCV capable of detecting 80+ COCO object classes.
- Optimized inference and preprocessing to achieve 28 FPS on webcam streams.
- Evaluated the model on 1,000+ test images, achieving mAP above 85% for common object categories.

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, SQL

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-Learn, Streamlit

Developer Tools: AWS, Docker, Git, GitHub, Jupyter Notebook

Web: HTML, CSS, Node.js, JavaScript, React.js

Databases: MongoDB, PostgreSQL

Soft Skills: Team Collaboration, Problem Solving, Communication, Leadership

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

CERTIFICATIONS

Complete Python Pro Bootcamp - Udemy

Applied Machine Learning in Python - Coursera

Internet Crimes and Cyber Security - NPTEL
